- Non-conformance Tracking

FEATURING:

- Customizable fields
- Adjustable data entry sequence
- Password protection
- Advanced reporting
- User Workgroups
- Sophisticated sorts and filters
- Fast and specific searching
- Straightforward setup and use

Increase Team Participation

Indicate responsibility for issues to the appropriate members of your team. C/A 6 documents and tracks all the activities that contribute to your corrective / preventive action projects.

Document Non-conformities

C/A 6 lets you identify problems, their root causes, and the actions taken to resolve them. The built-in analysis tools help you to identify your weaknesses in order to implement quality improvement initiatives.

Stay on top of Operations

Online and printed reports provide a live status of all your exceptions and the activities your team is performing to address them. These reports will become the best overall health indicator for your organization.

Perform Follow-up

Create action items that prompt you to perform 30, 60, and 90-day follow-up audits to ensure the effectiveness of your corrective/preventive actions.

Design Reports

Design your own reports using the built-in report designer. The Active Reporting system includes a wizard to guide you through creating any number of presentation-quality reports.

Control User Access

If you deploy C/A 6 in a multi-user environment, you can set up workgroups to define which features will be available to various types of employees. The licensing scheme allows unlicensed users to have view-only access to the system.

Define Search Criteria

User-definable queries may be easily defined to specify a set of criteria that determines the particular records to include in a list or report. The advanced query feature allows you to better filter and sort search results.

Generate Pre-defined Reports

Built-in reports include a variety of problem and action detail and list reports intended to help you make decisions about which issues are most important. Both built-in and customized reports look great and provide exactly the information you need.

HARRINGTON GROUP

Harrington Group Desktop Products

The Harrington Group is a recognized leader in quality management software. Our applications are used to meet the day-to-day demands of managing quality processes and solving real problems.

Audit Master

Plan and conduct quality system compliance audits with Audit Master, which includes a built-in corrective action system for handling the audit findings.

C/A 6

Manage corrective actions on a desktop or in a networked environment by categorizing issues, assigning responsibility for them, and tracking corrective activities.

Calibration Recall

Meet the calibration requirements of your quality system with the added benefit of a complete tool inventory and history.

Document Control

Track, organize, and manage any type of documentation. You can manage documents that are physically or electronically issued.

Maintenance Log Pro

Schedule and record equipment maintenance activity to forecast downtime, extend service life, and avoid warranty violations.

Training Manager

Track the complete training history of each employee to ensure that personnel are competent and qualified for their roles.

ESTABLISHED in 1991, Harrington Group has a history of focusing on quality and has developed a comprehensive set of management and technical processes based on ISO 9001:2000. The consistency achieved throughout the application of these processes provides the foundation for predictable performance and a reputation for delivering high quality products, on time and within budget.

In addition to our extensive product suite, Harrington Group offers a complete line of services to help any organization establish or improve its quality management operations. Contact us today for help with any aspect of your quality management system.
